Revitalize Your Damaged Hair While Bleaching & Coloring!
OXILOCK plasma - Miracle, Come True!

The exclusive complex of organic substances developed by the Jean Paul Myné laboratories, which allows the revitalization of damaged keratin fibers. Used with all chemical treatments in the salon, to allow the salon stylists to work in complete safety and achieve performances never seen before.

SIMPLE, SAFE AND REVOLUTIONARY

How to apply | PROFESSIONAL USE ONLY |

For maximum effectiveness, it is important to use the recommended doses with the aid of the dispenser provided, and follow the sequence of steps.

How to apply | PROFESSIONAL USE ONLY |

Notes:

More powder bleach can be added to reach the desired consistency. If more than 30 g of powder bleach is required, mix in a new bowl, complying with the recommended quantities.

Never exceed the amount of 7 ml of OXILOCK plasma no.1. ALWAYS COMPLY WITH THE RECOMMENDED DOSE, USING DIGITAL SCALES FOR ACCURACY.

QUANTITIES AND INSTRUCTIONS

<tbody>
<tr>
<td>Super-lightening and color</td>
<td>3.5 ml of No.1 (one dose)</td>
<td>Leaves to act for at least 10 minutes from roots to tips. Comb.</td>
<td>Apply 14 ml of OXILOCK plasma No.2 on medium-long hair.</td>
<td>Apply to lengths and ends, only at the end of the entire technical service as the final step, without shampooing first, leaving to act for at least 10 minutes depending on Requirements, Rinse and shampoo the hair.</td>
</tr>
<tr>
<td>Powder bleach</td>
<td>3.5 ml of no. 1 (one dose) for 15g of powder bleach (without considering the oxygen)</td>
<td>Leaves to act for at least 10 minutes from roots to tips. Comb.</td>
<td>14 ml of no. 2 on medium-long hair.</td>
<td></td>
</tr>
</tbody>
</table>

For the OXILOCK plasma N.1, the amount used should not exceed 3.5 ml of No.1 (one dose) to avoid an increased interaction with the oxygen. To avoid this, you can increase the amount of oxygen by one level.

OXILOCK plasma N.1 might cause a slight increase in the leave-in time required. To avoid this, increase the amount of oxygen by one level.

DO NOT increase the oxygen volume with very fine hair because it is very fragile.

OXILOCK plasma N.2

At the end of the service, rinse carefully and DO NOT SHAMPOO. Apply OXILOCK plasma No. 2, which works in synergy with No.1. Do not apply color or bleach after OXILOCK plasma STEP 2, only a GLOSS or TONER without activator may be applied.

How to apply | PROFESSIONAL USE ONLY |

- Rinse after bleaching or color. DO NOT SHAMPOO
- If applying a gloss or toner (without activator) after bleaching, color or lightening, apply and leave to act (the hair should be shampooed after this)
- Rinse and towel dry
- Apply 14 ml OXILOCK plasma No.2 from roots to tips. Comb.
- Leave to act for at least 10 minutes. Longer if the hair is damaged.
- Leave out of the hair and continue using shampoo and conditioner.

- Washing before the use of the activator is required.
- The use of the activator is required.
- If you apply more than 30 g of bleaching powder, mix in a new bowl, following the indications provided.
- The use of the activator is mandatory.
